Encinitas Union School District (EUSD) and Coastal Roots Farm are working together to transform school lunch! EUSD Farm Lab is home to the DREAMS Campus, and delivers a full day of science-based lessons to all district students, as well as daily access to fresh, local, nutrient-dense, heirloom and organic fruits and vegetables in their school salad bars and meals. This trailblazing team believes that there is nothing more important than connecting our children to fresh, nourishing food.

Coastal Roots Farm, a local non-profit community farm and education center, manages crop production for the school district, ensuring that all produce is grown with care - using organic practices.

The Farm Lab is the nation’s first certified organic farm that provides fresh produce to all schools in its district!

Jimbo’s has partnered with the Farm Lab to provide our customers with the freshest organic produce in town!

1.9 MILES
That’s the distance from the Farm Lab to Jimbo’s!
