Romaine Lettuce Recall

Saturday, November 23rd, 2019

The FDA has stated it would allow shipments and sales of Romaine lettuce harvested on or after Nov. 23 from areas outside the Salinas growing region. The permitted areas include the Imperial Valley and other desert growing regions in California, as well as Yuma, AZ, Florida and Mexico.

As of November 23rd, Jimbo's is only carrying organic Romaine lettuce from growing regions not affected by the warning area. Even better, the majority of our organic Romaine lettuce is locally grown in Escondido by JR Organics, and sold only to us and at local farmers markets...know your farmer!

If you purchased an organic romaine lettuce product on Nov. 23rd or recently before, we will gladly refund your money for the purchase as a level of commitment to you our customers.

Thank you,
Jimbo's Management
